1. (True/False) The variance of a model is determined by the degree of irreducible error.

1 / 1 point

☐ True☒ False

Correct! You can find more information in the Bias Trade Off lesson.

2. (True/False) As more variables are added to a model, both its complexity and its variance generally increase.

1 / 1 point

☒ True

Correct! You can find more information in the Bias Trade Off lesson.

☐ False

3. (True/False) Model adjustments that decrease bias also decrease variance, leading to a bias-variance trade off.

1 / 1 point

☐ True☒ False

Correct! You can find more information in the Bias Trade Off lesson.
